## How to select a book for infants and young toddlers?

Brain research with very young children, infants to 24 months, has shown that this age group learns and responds best from materials that contain the following—

1. are repetitious
2. are simple in content
3. are rhythmic and rhyme
4. have recognizable, realistic characters
5. contain likeable characters
6. have clear, uncluttered backgrounds
7. use basic colors
8. are easily identifiable
9. are memorable and enjoyable
10. have characters surrounded by plenty of white space in order to focus
11. provides an opportunity for kinesthetic experiences

Using the list above, examine the books provided and determine IF any are desirable and appropriate for sharing with a very young child.

Be prepared to defend your choices.
